Invest In America

A million new jobs a year call for at least \$17,000 new capital investment per job — seventeen billion dollars per year. And at least another twenty billion dollars a year is needed to maintain the plants and machinery providing the 57 million jobs we now enjoy. Where is the money coming from?

The answer: From the same source of capital that has provided it in the past — savings in the form of retained earnings of business enterprises and the savings of the American people — your savings.

You don't have to own stock in a corporation to be a capitalist — an investor. That's only one way. If you put your savings in a bank or savings and loan institution, or take out life insurance or buy real estate, you're a saver — your savings — is put to work by business and industry to develop jobs, production of goods and services. That's what investment means — putting money to work.

Let's voluntarily and wisely invest in America: our funds and our savings in our future. We are all capitalists — investors of our savings.

Servant or Master?

With the approach of Independence Day an editorial which appeared recently in The Saturday Evening Post contains fundamental statements which every American should remember, with pride and gratitude.

In part it says: "America is not a perfect society, and its people are not required to pretend that it is. Our newspapers, magazines, pundits and commentators constantly criticize the Government. The President of the United States reads an astonishing amount of this criticism. Sometimes he gets mad, and sometimes he accepts the advice of his critics. But although this country is by no means perfect, it is constantly changing for the better. The change is sometimes slow, but it happens without bringing up the tanks or purging our political leaders."

"All things considered, we believe that our system, of government has enabled its people to achieve a better life than have any other free men on earth. This may sound like an immediate claim, but what other great nation has combined such a high standard of living with such a high degree of individual freedom? Communism? The Communists have murdered freedom in the streets of Budapest and East Berlin. They have promised a workers' paradise on earth, and they are unable to provide their people with enough to eat."

"We believe that government is not an end in itself. It exists solely to provide a climate in which the people may make the most of their abilities and live their own lives in security and peace. This means that government must be vigilant, and it must have be active in many areas, but it must be the servant of the people and not their master."

F. H. A. Officers For 1962-63 School Year

Ulfia Felsing, president, called the meeting to order and the floor was then turned over to Miss Barbara Stone, commentator for the fashion show. Girls participating were the

Following the fashion show, girls earning their Junior degrees were recognized: Janet Hotard, Pat Fashier, Ferrell Kaufman, Irene Ashley, Linda Hart, Judy Siler, Joyce Kirchman, Maria Ely, Karen Harris, and Jill Chapman.

Installation of officers for the coming year high lighted the program. Parents attending were Mrs. McMillan, Mrs. Lee, Mrs. Hotard, Mrs. Stone, Mrs. Cato, Mrs. Wilder, Mrs. Kirchman, Mrs. Holm, Mrs. and Mrs. LaChance, Mrs. Cross, Mrs. Tryon, Mrs. Lettingwell, and Mrs. Adams. Refreshments were served by Miss Irene Ashley.

UNCLE DAN from DOOLIE says:

Dear Mister Editor: It looks like July Fourth don't mean much no more to this space age generation of Americans, I can recall when I was a boy folks would get together on July Fourth to hear some public office holder read the Declaration of Independence and then cut loose with a brand of patriotic oratory that would single the hair off a white face built two miles down the road. He'd allow as how it was willing to die for his country, and

a heap of the folks in the crowd was cheering. It would be better if he'd die for it instead of living off it. They wasn't much sincerity to it and maybe it's better like we got it now. Today we measure the joy of July Fourth by the number that gets killed on the highways and ever year it gets more joyful.

Your Library

THE LAST OF THE WHITE-FIELDS — by Elise Sanguinetti This is a provincial book, this is the best of that term. The locale is Georgia, and the story could have happened only there or in one of her sister states of the confederacy. The story unfolds through the eyes of twelve year old Felicia. More engaging than most adolescents, she is no less dramatic or imaginative. This leads her into the central crisis of the book, an interview with a Yankee magazine writer on the subject of school desegregation. Two themes, adolescence and race-relations, are usually treated with great respect to each other, but Mrs. Sanguinetti manages to pay her respects to both with a wit that chuckles.

THE NORTHERN PALMYRA AFFAIR — by Harrison E. Salisbury . . . Only a man of Mr. Salisbury's deep knowledge of Russian life and the Russian soul could have created this novel of citizens of Leningrad, that gallant and beautiful "Northern Palmyra" which Peter the Great built as his window on the West. The Lodestar is Irene Collins, daughter of Pre-Revolutionary liberals, a woman of such generosity and pride, such fire and passion that she must be loved or hated . . . This is Irene's story, and the story of those men and women . . . leaders in the city's artistic and political life . . . whose lives, having touched her, were thereby doomed or exalted.

Fer instand them investigators found they had \$470,000 stored up in Korea since 1959 fer soy beans just in case they might want to bring in some more soy beans. But the warehouse in Korea was already overflowing with soy beans that was going to rot on account of no place to use 'em. And they found \$10 million stored there that had been earmarked in 1959 fer a electric plant that had now been decided not to build.

In Turkey they found the military folks and the aid folks was trying to keep each other from knowing what they was doing, with the result they had duplicated \$300,000 fer trucks and now trucks was rusting away in storage. They also found, incidental, that it was costing \$7 more to recap a tire in Turkey than a new tire would cost back in the United States.

And while we are overloading warehouses in them foreign countries scattered around the world, things is getting higher and higher here at home. I was reading yesterday, fer instant, where groceriers was expected to reach a all-time high by the first of November. They is a old saying that fat folks don't live as long as skinny folks, but if food keeps going up, fat folks is going to live as long as they can afford to.

But I saw a style note in the Sunday paper where "There will be nothing new in corsets this fall." Come to think about it, Mister Editor, except fer price, has there ever been?

Yours truly,
Uncle Dan
